## **THE PENDING CLAIMS:**

- 1. (Previously Presented) Copolymers formed by TFE and FMVE, having Melt Flow Index (ASTM D 1238) from 8 g/10 min to 50 g/10 min, and having the following composition:
- FMVE in percent by moles from 3.7% to 5.2%;
  the percent TFE moles being the complement to 100% of the FMVE moles.
- 2. (Previously Presented) Copolymers according to claim 1 having the following property:
- the second melting temperature T(II) melt from 250°C to 300°C.
- 3. (Previously Presented) Process for preparing sheaths for cables by extrusion of copolymers according to claim 1.
- 4. (Previously Presented): Process according to claim 3 wherein the cables are LAN cables.
- 5. (Previously Presented) Wires having sheaths formed by the polymers of claim 1.
- 6. (Previously Presented) Copolymers according to claim 2 wherein the second melting temperature T(II) is from 275°C-289°C.
